Technical Health Overview Report
## for
ip_domain_locator

Behavioral Code Analysis
2021-10-31
by CodeScene

Summary

The Technical Health Overview captures the code health of your hotspots on a file level and on an architectural level in order to get a take-home report representing a snapshot of the technical metrics.
The document is addressed to the technical leaders that want an overview of the strong and weak parts in the codebase.

Overall code health

Hotspots	Average	Worst performer
7.8	7.8	7.8

Code Health identifies factors known to impact Maintenance costs and Delivery Risks. View dashboard to examine further.

Hotspots with Code Health Trends

Hotspot Name	Code Health	Identified Code Health Issue	Goals
ip_domain_locator.pl ip_domain_locator	7	• Global Complexity • Complex Method • High Degree of Code Duplication	

Hotspots By Sub-System

No subsystems have been configured.
